## 'CUT PIECE WORKFLOW SOLUTIONS'

**MAKING  
CUSTOMERS  
SUCCESSFUL  
FOR OVER A  
DECADE**

The M6 by DTG Digital was designed for multiple garment prints and fashion panel decoration. A dual 4 color ink system supports a wider variety of ink styles for increased textile direct applications with 3 ink solutions developed specifically for flatbed inkjet printing to textiles. Its flexible.

Pigment inks for cotton, viscose, polyester etc with rich colors. Dye sublimation inks for prints directly to polyester stretchable fabric with increased color gamut. Reactive inks for prints to cotton, silks, wool and more with incredible soft hand and vibrancy.

Fashion panel printing is gaining momentum in strike off and small lot manufacturing with fashion houses and contract decorators because of the ease of the flexibility that a flatbed digital printer delivers. There's no need for a roll to roll sticky belt which means a massive reduction in equipment and manpower costs.

### THE RIGHT MACHINE FOR YOUR APPLICATION Perfect for stretch/knit fabrics

Only DTG Digital offers the largest range of printing areas for finished garments or fashion panels (up to 2000 x 1100mm).
